**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

---

/ 1.(Currently amended) A method for delivering information to a person accessing a banner website from a terminal located remote from ~~the~~ a source of said banner website, ~~the~~ said terminal having an associated display upon which ~~the~~ a content of ~~the~~ said website is visually perceived by a person using ~~the~~ said terminal and a cursor whose position is controllable by ~~the~~ said person, comprising the steps of:

- A1
- (a) providing initial signals from said source of said website or from another remote source by means of Javascript when ~~the~~ said website is accessed by said person to establish a banner area on ~~the~~ said display, said banner area having banner boundaries and including (i) banner advertising message information that is visually perceivable by said person when said website is accessed and (ii) plural sub-areas of said banner area; and
  - (b) enabling said person to control said cursor to position said cursor on any one of said sub-areas of said banner area to provide a selected sub-area, whereupon said person is automatically provided by means of Javascript with respective additional visually perceivable advertising message information associated with said selected sub-area, said additional visually perceivable advertising message information being provided without requiring other

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

action by said person, ~~said respective additional visually perceivable information being imperceivable by said person until said cursor is located on said selected sub-area~~ by displaying said additional visually perceivable advertising message information being displayed in a selected region of said display;

- (c) enabling said person to control said cursor to position said cursor on said selected region; and
- (d) said respective additional visually perceivable advertising message information being imperceivable by said person until said cursor is located on said selected sub-area and remaining perceivable to said person as long as said cursor is positioned on said sub-area or said selected region.

A1  
2.(Currently amended) The method of Claim 1 wherein ~~the additional visually perceivable information is provided~~ said selected region is disposed substantially outside the boundaries of said banner area.

3.(Currently amended) The method of Claim 1 wherein said additional visually perceivable advertising message information includes audio information.

4.(Currently amended) The method of Claim 1 wherein said additional visually perceivable advertising message information includes video information.

5.(Currently amended) The method of Claim 1 wherein said additional visually perceivable advertising message information comprises mixed media information.

✓ 6. Cancel

---

7.(Currently amend) The method of Claim 1 wherein said initial signals carry the instructions necessary for enabling said terminal to establish said additional visually perceivable advertising message information when in receipt of appropriate data and when said instructions operate upon said appropriate data.

8.(Currently amended) The method of Claim 7 wherein said method further comprises the step of re-accessing said source of said website or accessing another source for receiving the said appropriate data upon which said instructions operate to provide said additional visually perceivable information.

A2 9.(Currently amended) The method of Claim 6 1 wherein said ~~additional visually perceivable information is displayed in a selected region~~ is disposed adjacent said selected sub-area ~~and said additional visually perceivable information remains perceivable to the person as long as said cursor remains on said selected region.~~

10.(Currently amended) The method of Claim 9 wherein said additional visually perceivable advertising message information contains link information for linking said person to a further website when said person clicks on said selected region.

11.(Currently amended) The method of Claim 1 comprising the steps of:

- (a) receiving said visually perceivable banner advertising message information;
- (b) receiving said additional visually perceivable advertising message information; and

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

- (c) specifying a placement of said additional visually perceivable advertising message information with respect to said visually perceivable banner advertising message information.

12.(Currently amended) The method of Claim 11 comprising the steps of:

- (a) receiving first identification data representative of said visually perceivable banner advertising message information;
- (b) receiving second identification data representative of said additional visually perceivable advertising message information; and
- (c) displaying said visually perceivable banner advertising message information and said additional visually perceivable advertising message information in accordance with said first and second identification data.

13.(Original) The method of Claim 12 comprising the step of building a use map in accordance with said first and second identification data.

14.(Currently amended) The method of Claim 13 wherein the step of providing said additional visually perceivable advertising message information comprises the steps of:

- (a) building a pop-up function in accordance with said additional visually perceivable advertising message information;
- (b) adding hypertext markup language information to said pop-up function to provide an enhanced pop-up function; and

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

- (c) displaying said visually perceivable banner advertising message information and said additional perceivable ~~banner~~ advertising message information in accordance with said enhanced pop-up function.

15.(Currently amended) The method of Claim 1 comprising the further step of altering the associations between said sub-areas and said respective additional visually perceivable advertising message information and repeating step (b).

16.(Currently amended) The method of Claim 15 comprising the steps of:

- (a) recording parameters representative of the performance of said additional visually perceivable advertising message information to provide recorded performance parameters; and
- (b) altering said associations between said sub-areas and said respective additional visually perceivable advertising message information in accordance with said recorded performance parameters.

17.(Currently amended) The method of Claim 16 comprising the steps of altering said associations between said sub-areas and said respective additional visually perceivable ~~banner~~ advertising message information in accordance with predetermined recorded performance parameters.

18. (Currently amended) The method of Claim 17 comprising the steps of altering said associations between said sub-areas and said respective additional visually perceivable ~~banner~~ advertising message information in accordance with recorded performance parameters selected after

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

said altering of said associations between said sub-areas and said respective additional visually perceivable advertising message information .

19. (Currently amended) The method of Claim 1 comprising the steps of:

- A2
- (a) transmitting a request having request information to a server database on a further website containing stored ~~visually perceivable~~ visual information in response to said positioning of said cursor on said selected sub-area;
  - (b) selecting said additional ~~visual~~ visually perceivable advertising message information from said stored visual information in response to said request information; and
  - (c) transmitting said ~~selected stored visual~~ visually perceivable advertising message information selected from said stored visual information to said banner website.

20.(Currently amended) The method of Claim 1 wherein said terminal provides a terminal display having a display iframe comprising the steps of displaying said additional visually perceivable banner advertising message information within said display iframe and displaying said additional visually perceivable advertising message information in response to positioning said cursor on said iframe.

21.(Currently amended) A system for delivering advertising messages to a person accessing a website from a terminal located remote from the source of said website, said terminal having an associated display upon which the content of said website is visually perceived by a person using the

Application No. 09/723,505

A<sup>2</sup>  
terminal and a cursor whose position is controllable by said person, said system comprising means coupled to said source of the website or to another remote source for providing initial signals from said source of the website or from ~~the~~ said other remote source when said website is accessed by said user to establish a banner area on said terminal by means of Javascript, said banner area including banner advertising message information that is visually perceivable by said person when said website is accessed and plural sub-areas of said banner area, said initial signals causing ~~the~~ said terminal to provide respective additional visually perceivable advertising message information associated with a selected sub-area by means of Javascript, when said cursor is located over ~~the~~ said selected sub-area, said additional visually perceivable advertising message information being provided by the terminal substantially outside of the ~~bounds~~ boundaries of said banner area and without requiring other action by said person, said respective additional visually perceivable advertising message information being imperceivable by said person until said cursor is located on said selected sub-area.

22.(Currently amended) The system of Claim 21 wherein said additional visually perceivable advertising message information also includes audio information.

23.(Currently amended) The system of Claim 21 wherein said additional visually perceivable advertising message information includes video information.

24.(Currently amended) The system of Claim 21 wherein said additional visually perceivable advertising message information comprises mixed media information.

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

25.(Currently amended)The system of Claim ~~14~~ 21 wherein said additional visually perceivable advertising message information remains perceivable to said person as long as said cursor remains on said sub-area.

26.(Currently amended) The system of Claim 21 wherein said initial signals carry the instructions necessary for enabling said terminal to establish said additional visually perceivable advertising message information when in receipt of signals transmitted from a further website in response to said instructions.

A2  
27.(Original) The system of Claim 26 wherein said initial signals require accessing said further website for selecting said transmitted signals.

/28.(Currently amended) A method of enabling a user on a web site to traverse a banner presented on said web site using an indicator to display an image in response to said traversing of said banner, comprising the steps of:

- (a) providing said banner ~~with a selected~~ by means of Javascript, said banner having a first hot spot ~~having with~~ an associated image;
- (b) activating said first hot spot when said indicator traverses said ~~selected~~ first hot spot;
- (c) enabling said associated image of said ~~selected~~ first hot spot by means of Javascript when said ~~traversed~~ first hot spot is activated to provide an enabled image;

- (d) moving said indicator to said enabled image and retaining said enabled image while said indicator is disposed on said enabled image; and
- (e) removing said enabled image by means of Javascript when said indicator is moved off said enabled image.

A2 29.(Original) The method of Claim 28 wherein a further web site is associated with said associated image further comprising the step of clicking on said enabled image and transporting said user to said further web site in response to said clicking.

30.(Currently amended) The method of Claim ~~21~~ 28 wherein said banner is provided with a ~~further~~ second hot having a further image associated therewith ~~spot further~~ comprising the further step of traversing said ~~further~~ second hot spot by said indicator within said banner and enabling ~~[[a]]~~ said further associated image in response thereto.

31.(Currently amended) The method of Claim ~~21~~ 28 wherein said indicator is directed by a mouse having a right mouse button and a left mouse button and said user traverses said first hot spot without clicking on ~~the said~~ right or left ~~button of said mouse~~ buttons.

32.(Currently amended) The method of Claim ~~23~~ 30 comprising the further step of altering ~~the said~~ associations between said ~~hot-spots~~ first and second hot spots and said associated images and enabling said further associated image when said ~~selected~~ first hot spot is traversed.

---

A3 33. (New) The method of Claim 1 wherein said selected region is disposed partially over said selected sub-area.

Application No. 09/723,505  
Amendment Dated September 18, 2003  
Reply to Office Action of June 18, 2003

A<sup>3</sup> 34. (New) The method of Claim 1 wherein said selected region is disposed outside said  
selected sub-area.
